

We are delighted to introduce our new lab in a box – the chemagic 8.

Eight different features facilitate your laboratory workflow process from primary sample handling via Nucleic Acid isolation to diagnostics and storage. The chemagic 8 was developed in collaboration with ABBIS bio process automation. This prototype is currently under construction. Use your chance to influence the future developments. Decide on your own which feature fits the most to your laboratory workflow process.

8 Benefits

- 1. Automated**
 - From primary sample via NA preparation to diagnostics and storage
- 2. Modular**
 - Extensions, integrations and updates can be easily facilitated
- 3. Reliable**
 - Approved technologies are included such as the chemagic MSM I
 - Reproducible results
- 4. Save**
 - No cross contamination
 - Barcode reading prevents sample mix-up
- 5. Fast**
 - Variable speed
 - Time consuming processes are done automatically
- 6. Efficient**
 - Cost effective
- 7. Flexible**
 - 8 axes allow 360° movement
- 8. 24/7**
 - Operates day and night (24 h and 7 days/week)
 - In-process sample loading possible
 - Minimized hands on time
 - Maximum throughput
